Global Supply Chain

China sales office supports entry into the world’s second-largest dietary supplement market through strong CBEC capabilities and 13 years of local business expertise. We are delivering the prototype testing and product development conducted by our R&D institute in our headquarters located in South Korea.

The U.S. sales office serves as COSMAX NBT’s strategic gateway to the world’s largest dietary supplement market, offering tailored market strategies aligned with American consumer expectations. Moreover, US sales office bridges international brands with the American, EU, LATAM markets, simplifying operations.

Formulation Technology

COSMAX NBT leverages a wide range of advanced formulation technologies to create differentiated health-functional products. We are committed to deliver enjoyable new experiences in supplement consumption through innovative formats, textures, and customer-centric design.

a:dam®

a:dam® is COSMAX NBT's technology that minimizes excipients and reduces tablet and capsule size for easier consumption.

a:dam® Mini & Ball Tab

a:dam® Mini & Ball Tab — ultra-small tablets (<4 mm) that can be chewed easily without water, providing a comfortable and enjoyable mouthfeel.

SaRrr™

A technology that allows poorly soluble powders to disperse and dissolve quickly in water or milk, even at low temperatures.

BoRrr™

A technology that allows powder to melt naturally in the mouth — no water required.

Droplet Shape Soft Capsule

The drop-shaped soft capsule has an ergonomic curve for easy swallowing and a comfortable intake experience.

Popping Puff

A crispy, puffed snack that makes functional ingredients fun and easy to enjoy.

Gummy

Gummies bring together great taste, playful design, and functional benefits – making them an enjoyable format for all ages.

Emul Tech®

Emul Tech® – A proprietary oil-and-water emulsion technology that ensures uniform dispersion of oil-based actives across various formats.

Various Type of Chewable Tab

Our coated tablets deliver a satisfying, crunchy, anytime snack experience and feature Korea's first upgraded ODT powered by AeroMel™ Technology. The proprietary porous structure enables the water-free tablets to melt instantly- within 5 seconds-upon saliva contact for effortless intake.

Functional Ingredients

Research and development of various functional patented ingredients based on natural products

Beauty within

Naticol®

Naticol® is a French collagen peptides that help reduce wrinkles and improve skin hydration and elasticity.

AGEs Blocker™

AGEs Blocker™ inhibits the formation of Advanced Glycation End Products (AGEs), suitable for the slow-aging trend.

Agatri®

Agatri® — a skin-focused inner beauty ingredient designed to combat photoaging, by helping protect the skin from UV-induced damage.

Theolim™

Theolim™ helps support weight management and enhance metabolism

ReSeringe®

ReSeringe® helps reduce body fat, moisturize the skin, and protect it from UV damage.

Ceramosides™

Ceramosides™ is a plant-based ceramide that helps reinforce your skin's moisture barrier from the inside out.

Wellness

Tabetri®

Tabetri® is a joint health ingredient that maximizes anti-inflammatory effects through an extraction method patented in three countries.(KR,CN,US)

TWK10®

TWK10® is a kimchi-derived probiotic shown to boost exercise performance by increasing stamina and reducing muscle fatigue.

Shoden®

Ashwagandha® is a natural sleep ingredient with no side effects, supporting deep sleep at night and energizing your day.

L7DG™

L7DG™ is a Perilla frutescens extract that helps relax ciliary muscles and improve focus, reducing eye fatigue within 7 days.

Gastro-AD®

Gastro-AD® is a premium stomach health ingredient with no side effects, proven to relieve heartburn symptoms within 15 minutes.

Respecta®

Proliferation of vaginal beneficial flora to suppress pathogenic bacteria

Factory Standardization

We deliver reliable, high-quality products through production facilities that strictly adhere to the rigorous standards of leading global companies. This commitment is backed by our internationally certified quality control expertise. Building on this foundation, we leverage advanced factory automation(FA) to maximize production efficiency and ensure consistent excellence.

Advanced EPP(Exclusive Production Line for Probiotics)

Our exclusive Advanced EPP probiotic line maximizes the viability of every strain. Precise control of temperature and humidity enhances survival and reduces customer costs. This technology supports global strains, ensuring high-quality, standardized probiotic manufacturing.

Certifications

Distributing reliable, high-quality products supported by internationally certified quality control expertise

Facility / Quality
